1963-CROP WHEAT PROCLAMATIONS POSTPONED

Proclamations relating to marketing quotas and acreage allotments for the 1963 crop of wheat have been temporarily postponed, according to an announcement by Secretary of Agriculture, Orville L. Freeman.

The postponement was authorized by legislation recently enacted by Congress which permits the Secretary of Agriculture to defer until June 15, 1962 any proclamation as to marketing quotas and acreage allotments for the 1963 wheat crop which otherwise would be required to be made by May 15.

C. D. Lewis, Chairman of the Agricultural Stabilization and Conservation County Committee, reminds wheat growers that the Wheat Stabilization Program provided under legislation enacted last year applies only to the 1962 crop of wheat. Under that program, individual farm wheat allotments were reduced 10 per cent below what they would have been under a minimum national acreage allotment of 55 million acres, and diversion payments were available to those producers who shifted wheat acreage to a conservation use. Wheat price support was available only to those wheat producers who participated in the Wheat Stabilization Program and who stayed within their farm allotments.

The Chairman emphasized that the legislation governing the 1962 wheat program also increased the marketing quota penalty rate as well as the amount of wheat subject to penalty, and extended the quota program to many small farms which were previously exempt from quotas. The marketing quota penalty rate for 1962 "excess" wheat has recently been announced at $1.59 a bushel, compared with a 1961-crop penalty rate of -1.08 per bushel.

Mr. Lewis urged wheat growers who are not clear about the wheat quota provisions to check with the ASCS County Office for full information.
